Perceptions of nicotine and relative harm of tobacco products in U.S. young adults

This study harnesses secondary analyses of longitudinal data from a large, national sample of U.S. young adults to produce an in-depth examination of young adults' perceived harm of nicotine, relative harm of tobacco products, and the impact of these perceptions on subsequent tobacco-related intentions and behavior.

Improving Smoking Cessation in Socioeconomically-Disadvantaged Young Adults

The goal of this study is to delineate how best to frame and deliver an efficacious smoking cessation intervention for socioeconomically-disadvantaged young adults (SDYA) smokers to improve cessation outcomes in this at-risk group.

Co-investigator (PI: Mays)

05/01/2018 – 04/30/2021

1R01CA229082-01

Optimizing Hookah Tobacco Public Education Messages to Reduce Young Adult Use

This study will use a rigorous, multi-method biobehavioral approach to understand how to effectively communicate to young adults about hookah tobacco.

Co-investigator (PI: Higgins)

09/01/2018 – 08/31/2023

2U54DA036114-06

University of Vermont Tobacco Center of Regulatory Science

The UVM TCORS has the expertise to assist the FDA CTP mission by investigating the impacts of tobacco product use on addiction, behavior, and health biomarkers and outcomes in these vulnerable populations.

1R21DA046333-01A1
Addiction and Behavior Related to Menthol Cigarette Substitutes
The proposed study uses an in-laboratory and ad libitum outpatient mixed design to examine the abuse liability and substitutability of plausible menthol cigarette alternatives, including menthol filtered cigars and pipe tobacco, in 80 current adult menthol cigarette smokers.

R03CA187756 NCI Small Grants Program for Cancer Research (NCI Omnibus R03)
Examining Social Influences on Young Adult Smoking and Cessation Trajectories
The goal of the current study is to examine, in-depth, the characteristics of social smoking young adults, their potential smoking risk trajectories, and social influences on these patterns. This research lays the groundwork for developing more effective primary and secondary cancer prevention interventions for social smoking young adults by elucidating the factors that maintain or impede smoking behavior in this important group.

Population Assessment of Tobacco and Health, National Longitudinal Survey of Tobacco Use, National Institute on Drug Abuse/Center for Tobacco Products, FDA (subcontract through Westat). PATH is a national, longitudinal cohort study of more than 50,000 users and non-users of tobacco products ages 12+. Results from this study will be used to evaluate the impact of FDA-CTP regulation of tobacco products.

Center for Evaluation and Coordination of Training and Research in Tobacco Regulatory Science (subcontract through Westat). The overall objective of the CECTR is to evaluate and coordinate research and training programs that can inform the FDA CTP's tobacco product regulatory activities and actions. Through leadership, evaluation, coordination, and facilitation of collaborative efforts, the

CECTR can accelerate the advancement of science relevant to the Family Smoking Prevention and Tobacco Control Act (FSPTCA).
