

Kramer Wahlberg, MD
Fellow, Department of Medicine – Cardiology
Vice Chair, Early Career Advisory Committee

Kramer Wahlberg, MD was born and raised in the Pacific Northwest. He studied bioengineering at Washington State University where he was a four-year oarsman on the men's crew team before going on to complete medical school at the University of Washington School of Medicine. Dr. Wahlberg then made the move to the University of Vermont for Internal Medicine residency, where he also served as a Chief Resident. Currently, he is in the first year of his Cardiovascular Medicine fellowship at UVM Medical Center. Dr. Wahlberg has research interests in heart failure, medical education and quality improvement.

Dr. Wahlberg joined the CVRI ECAC in 2019 and is looking forward to continuing to work with this motivated group of early career investigators to generate enthusiasm for cardiovascular research at UVM. In particular, he hopes to improve collaboration with medical students, residents and graduate students who have interests in cardiovascular medicine in order to develop and foster these important relationships early on during their training.
