Subject: [gssalist] Medical Education Fellow at the University of Miami Miller School of Medicine

Dear Colleagues, please consider forwarding this to your rising 3rd and 4th year students.

Thanks,

Now in its fifth year, the University of Miami Miller School of Medicine is continuing to offer a one year medical education fellowship to a medical student after completion of year 2 or year 3 of the traditional MD curriculum. Through our Educational Development Office, this fellow will work primarily on our 'Cane Academy initiative, working directly with members of the medical education administration. The 'Cane Academy initiative assists with facilitating a competency-based, self-directed curriculum that leverages educational technology including but not limited to online modules with short videos, self-assessment questions, and in-class problem solving sessions leading to formative and summative assessments.

Please see out video describing the position in more detail: <https://youtu.be/QZ2v764t-f0>

This fellow must already have expertise in instructional technology resources to assist in growing the initiative and will work collaboratively with faculty and staff on technological solutions for blended learning. Previous experience with digital video editing is desired. A graduate student stipend for the year will be provided along with support for travel to medical education conferences. For more info, please contact: Dr. David Green (senior instructional designer) at david.green@miami.edu or Dr. Alex J. Mechaber (Senior Associate Dean for Undergraduate Medical Education) at amechabe@med.miami.edu.

Alex J. Mechaber, MD, FACP

Bernard J. Fogel Chair in Medical Education

Senior Associate Dean for Undergraduate Medical Education

Professor of Medicine

Acting Co-Director, Educational Development Office

University of Miami Miller School of Medicine
