# Molecular Genetics Major

UVM | College of Agriculture and Life Sciences | Department of Microbiology and Molecular Genetics

Advising Form 2023-2024

## Graduates of this major will be able to:

- *Describe and apply basic molecular genetics information, concepts and experimental techniques*
- *Explain and evaluate molecular genetics research orally and in writing*
- *Demonstrate integrity, professionalism, and respect for inclusion in the conduct of science and learning*
- *Articulate own identity as a member of the scientific community and reflect on how that has developed throughout progression toward career goals*

UVM students meet the above goals by completion of at least 120 credits, including the Catamount Core Curriculum and MMG core coursework. Students then tailor their education to their interests, selecting courses from a broad range of electives in the biological sciences. Students must maintain a minimum cumulative GPA of 2.0 to remain in good standing in the program and college.

Please use this worksheet to create a four year plan. Review with your advisor each semester.
