

Please see below from our Associate Dean and DIO, Dr. Diane Davey. Please spread the word to your medical students. Thank you!

I am writing to announce that a new General Surgery Residency Program, based at Osceola Regional Medical Center in Central Florida (Osceola County within greater Orlando region) has just received initial accreditation from the ACGME for 15 categorical positions and is seeking immediate applicants. Applications should be submitted through ERAS (the NRMP program code is 1587440C1). Qualified applicants will be selected for interviews.

This program is part of the University of Central Florida (UCF)-Hospital Corporation of America consortium and will accept 3 categorical residents per year. The program will be directed by Dr. Philip Kondylis. Osceola Regional Medical Center is a 400-bed level II trauma hospital and is the sole provider of a growing list of specialty and subspecialty services within Osceola County. The Orlando VAMC, a new state of the art facility with multispecialty and surgery services across from UCF in the Lake Nona region of Orlando, will be a major participating site for residents. The VAMC shares a campus with the national SimLEARN simulation facility. Pediatric surgery rotations will occur at Nemours Children's Hospital-Orlando. The surgery residency program is the 19th accredited UCF/HCA consortium program and residents will work alongside residents and fellows in multiple other ACGME programs including Internal medicine, emergency medicine, obstetrics & gynecology, neurology, and transitional medicine.

In addition to applying through ERAS, please contact Ana Acevedo at Ana.Acevedo@hcahealthcare.com, Dr. Kondylis at Philip.Kondylis@hcahealthcare.com or refer to the UCF/HCA Greater Orlando GME programs at <https://med.ucf.edu/academics/graduate-medical-program/> and <https://osceolaregional.com/>.
