Subject: Submission for UVM Weekly Wire newsletter

Hello,

We will be distributing a survey from Spencer Dunleavy at Oxford University in the student newsletter for the **first two weeks in April**. Please ensure it is sent out in the newsletter for the weeks of April 1-7 & April 8-14.

Needed Information:

Class years: M1-M4

Description: We have been invited to take part in a joint Harvard/Oxford study looking at empathy and attitudes toward the homeless in medical schools, and [we hope you will fill out this quick 7-minute survey!](#)(compatible on computers and mobile). **If you take part in this study, you'll get to see how your attitudes toward the homeless compare to other doctors who have taken the survey in the past, some who work with homeless patients and some who do not.** Attitudes toward the homeless are incredibly important for this population's health outcomes, as people experiencing homelessness are one of the least likely groups to see a physician when needed, they have a life expectancy below 50, and they are even less likely to see a doctor when they are treated dismissively or poorly.

Survey URL (also linked in text above):
